

ULTRASOUND REPORT

HIS No : 202600243922

Date: 02.02.2026

Time: 08:33:00

Patient's Name : ARLYN ABANADOR OGDEN

Age: 46

Date of Birth : 08.26.1979

Gender: F

Company :

RID No: 225135

Address :

Attending Physician : Darius R. Enario

Examination : Abdominal and Pelvic Studies - Whole Abdomen

Interpretation :

Liver Span: 16.2 cm	Right Kidney: 12.1 x 5.2 cm
Spleen: 9.8 cm	Cortical Thickness: 1.7 cm
Pancreas: 1.9; 1.4; 1.9 cm	Left Kidney: 12.1 x 6.6 cm
GB: 7.5 x 2.1 cm	Cortical Thickness: 1.9 cm
CBD: 0.4 cm	Uterus: 8.2 x 2.3 x 4.5 cm
Aorta: 1.4 cm	

The liver is enlarged showing slight increase in the parenchymal echogenicity. Intrahepatic ducts are not dilated. No focal mass lesion is seen. The gallbladder is adequately distended. There are multiple lithiasis seen within the gallbladder, largest measures 1.8 cm. The gallbladder wall is not thickened. Common bile duct is not dilated.

The pancreas is normal in size, no focal lesion seen. Pancreatic duct is not dilated. The spleen is within normal in size. No masses seen. The visualized aorta is normal in course and caliber.

The kidneys are normal in size and configuration showing good corticomedullary differentiation. Parenchymal echogenicity is normal. The central medullary echoes are dense and compact. No ectasia or lithiasis seen. The ureters are not dilated.

Urinary bladder is adequately distended. No intraluminal masses or lithiasis seen. Urinary bladder wall is not thickened.

The uterus is anteverted. No focal mass lesions seen. Endometrial stripe is intact. The adnexae are unremarkable. No free fluid detected in the posterior cul-de-sac.

Impression :

- HEPATOMEGALY WITH MILD FATTY INFILTRATION.
- CHOLECYSTOLITHIASIS WITHOUT SONOGRAPHIC SIGNS OF CHOLECYSTITIS.
- NORMAL STUDY OF THE SPLEEN.
- UNREMARKABLE VISUALIZED PANCREAS AND ABDOMINAL AORTA.
- NORMAL KIDNEYS AND URINARY BLADDER.
- UNREMARKABLE UTERUS AND ADNEXAE.
