Mini HDMI Port
Micro SD Slot

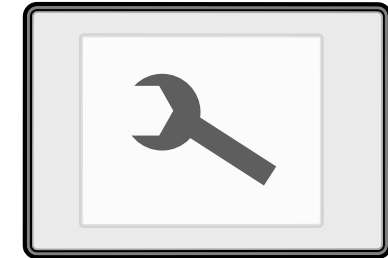

Camera View/Menu

Removing the Camera from the case

Settings

Video Resolution

Choose the quality of the Video Resolution. 4K, 1080p, 720p, etc.

Looping Video

Often used for dash cams, "Looping" continuously records 3 or 5 minute videos. As the memory card is full, the camera deletes the older files so there will always be room for a new file.

Time Stamp

Adds a time stamp (dd/mm/yyyy) on videos recorded.

Exposure

Changes the brightness of the camera. The higher the number (+) the brighter the image, lower the number (-) the darker the image.
